

Oceans of NIGHT

the shadowheart mirror

Oceans of Night is a heavy rock/metal band that synthesizes a diverse range of musical influences under the deceptively descriptive title of “ambient progressive rock”. As the enigmatic and mysterious name suggests, Oceans of Night forge a powerful, modern and dynamic musical experience that demands your undivided attention.

Consisting of musical mastermind Scott Mosher and vocal powerhouse Scott Oliva, the debut Oceans of Night CD, *The Shadowheart Mirror*, released in 2009, is equal parts progressive metal and modern rock served with a distinct ambient flavor. *The Shadowheart Mirror* is a dark, haunting and cinematic musical statement that resonates with emotional impact.

Through the course of 4 CD's, Scott Mosher has bridged the worlds of progressive metal, melodic hard rock and ambient music to create an experimental yet complimentary style of ambient metal that is at once as subtle as it is powerful, aggressive as it is dynamic and timeless as it is modern. Scott Oliva continues to perform in the legendary NY Iron Maiden tribute band, Live After Death and has played with Wind Wraith, Inner Strength, Last Vision Black and Driven. The Scott's have previously worked together on Mr. Mosher's 4th CD release, *Deep Horizon*, in 2006.
